EDUCATION

SINGAPORE MANAGEMENT UNIVERSITY

Jan 2025 - Jul 2026

Master of IT in Business (Data Science and Analytics)

ANNA UNIVERSITY – INDIA

Aug 2012 - May 2016

Bachelor of Engineering in Electronics and Communication Engineering (First class with distinction)

ACADEMIC PROJECTS

Financial Inclusion Analysis in Kenya

Jan 2025 - Apr2025

Tools Used: SAS Viya - SAS Model Studio, SAS Data Studio

- Analyzed a large-scale FinAccess survey dataset (**21K+ records, 3K+ features**) in **SAS Viya**, uncovering patterns and trends in financial inclusion across demographics and regions
- Performed **exploratory data analysis** and statistical testing in **SAS Viya** to identify the key factors influencing access to formal financial services, delivering actionable, evidence-based insights
- Prepared actionable insights and visual reports in **SAS Viya** to communicate insights enhancing data-driven decision making and interpretability for stakeholders
- Developed practical actionable strategies to improve access to financial services such as flexible financial products, rural-focused financial literacy programs and mobile money expansion

Singapore HDB Resale Price Analytics

Jan 2025 - Apr2025

Tools & Libraries Used: Python, Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib

- Orchestrated deep-dive exploratory analysis using **Pandas and Numpy** identifying regional hotspots (**Punggol, Sengkang, Bukit Merah**) and growth opportunities in HDB resale prices and transaction volumes
- Visualized key relationships such as flat age vs resale price per sqm using **Seaborn** and **Matplotlib** offering intuitive interpretation of pricing trends and market dynamics for stakeholders
- Derived actionable insights on market trends, flat size distributions, and region-wise price variations, providing evidence-based recommendations for property investment
- Translated analytical results into strategic recommendations, highlighting high-volume and high-opportunity HDB regions for stakeholders

Netflix data analysis

Apr 2025 – Jun 2025

Tools Used: Python, MySQL, SQLAlchemy

- Designed and implemented an **ELT** pipeline to process Netflix dataset, leveraging **Python** for data extraction and **SQL** for data loading, cleaning, and transformation
- Performed data cleaning and transformation in **SQL**, handling missing values, standardizing formats and creating aggregated views to ensure data quality and usability for analysis.
- Conducted **exploratory data analysis (EDA)** on clean and transformed data to uncover trends, usage patterns and insights relevant for business decision-making.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, SQL
- **Data Analysis and Visualization:** Power BI, SAS Viya, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Databases and Querying:** MySQL, PostgreSQL
- **Automation and Frameworks:** Selenium, Serenity, Jenkins
- **Statistical and Machine Learning Techniques:** Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Hypothesis Testing (ANOVA, Chi-square, t-test), Regression Analysis, Supervised & Unsupervised algorithms
- **Version Control:** Git

EXPERIENCE

NTT DATA – Singapore

Dec 2023 - Jul 2024

Automation Engineer

- Automated application workflows using Java, achieving a 70% reduction in manual application testing efforts and significantly increasing the testing accuracy
- Developed SQL queries to retrieve data from database and performed thorough validation to ensure application data integrity, enabling business stakeholders to make data-driven decisions

HCL TECH LTD - Singapore

May 2023 - Dec 2023

Software Quality Specialist

- Managed the automation project codebase and refactored automation scripts using Java, resulting in a 40% reduction in script execution time
- Published weekly automation status reports and metrics, helping stakeholders address key issues and make informed decisions to streamline business processes and prioritize critical improvements in the application

QUESS CORP - Singapore

Aug 2021 - May 2023

Automation developer

- Implemented an Automation framework for front office banking application integrated with CI/CD pipeline which optimized the testing lifecycle and enhanced the overall productivity by 20%
- Actively collaborated with the business team to analyze the business requirements and successfully automated over 100+ end to end application workflows using Java

TETHERFI PTE LTD - Singapore

Feb 2020 - Jul 2021

Software Implementation Specialist

- Handled the creation, execution and maintenance of the automated scripts using Java which significantly saved 50% of the manual efforts spent by business analysts
- Analyzed reports to evaluate application performance, identify key trends and recommend improvements that significantly enhanced system performance and user experience

WIPRO TECHNOLOGIES LTD – India

Sep 2016 - Jul 2018

Project Engineer

- Reviewed the business requirements and translated them into automated workflows using Java, thereby reducing the script execution time
- Evaluated the application reports and delivered insights to the business team to improve user engagement and functionality
