ID Card by Region and Gender

1. Insights on ID card possession among Kenyan residents

- Among the rural population, 61% hold national ID cards, with 26% of females and 35% of males possessing one.
- The rate of ID ownership in rural areas could be driven by government initiatives and greater reliance on national IDs for accessing essential government services.

Frequency, Frequency Percent by ID_Recoded

Financial status by Region

2. Insights on financial condition of rural and urban residents

- The financial condition has worsened for 34% of residents from rural areas, indicating that people in rural areas are facing slightly more financial challenges compared to those in urban regions.
- The financial situation has also worsened for 20% of the individuals in urban areas.

Frequency, Frequency Percent by Region_Recoded

Monthly Income

3.Insights on monthly income of Kenyan residents

-The range of monthly incomes spans from 100 to 180K with the majority of the population (around 80%) earning between 1.5K to 3K. This indicates that most individuals earn relatively modest incomes, while only a small portion of the population enjoys significantly higher earnings.

-In rural areas, income is mainly concentrated below the average of 9,300 with most individuals earning less. In urban areas, there is a wider income range with high earners driving the average up, while the median remains at 10,000 indicating a more diverse income distribution.

Business Recommendations

RECOMMENDATIONS

- Develop financial products such as seasonal loans, flexible savings, and insurance for seasonal and self-employed workers.
- Leverage mobile money products like MPesa to expand digital financial services, especially in rural areas where mobile money usage is high.
- With 84% of residents seeking financial advice from family or personal experience, businesses have an opportunity to offer formal financial guidance.
- Create digital skills training programs for both rural and urban populations to facilitate access to digital income opportunities.
- Provide business development support, including mentorship, planning, and market linkages, to help informal workers grow their businesses and income.
- Establish local financial literacy programs in rural areas to empower individuals to make informed financial decisions.
